

ADCI WEEKEND READING FILE

25 February 1977

- TAB A Memorandum from Chairman, DCI EEO Advisory Panel,
Subject: Elaboration on Panel Recommendations re
Vacancy Notices and Personnel Auditors. Included per
your request.
- TAB B Responses to Questions Posed by House Appropriations
Committee on Intelligence Community Staff FY 1977
Supplemental. Provided by the IC Staff. Included
per your request.
- TAB C "Coverage and Sources of Selected CIA Intelligence
Publications Fiscal Year 1976." A report prepared by
the Requirements and Evaluation Staff, Office of the
Comptroller. The report summarizes the coverage and
the sourcing of: the NIB and NID from July 1975-
June 1976; and intelligence memoranda, intelligence
reports, and special reports. The report indicates
fairly balanced geographical coverage in both categories,
but functionally, a heavy emphasis on political matters
(66%) in the current intelligence publications - due
to the nature of the beast but in part because economic
reporting has declined. [REDACTED] 25X1
- [REDACTED] As the report indicates,
its conclusions are affected by the fact that its range
is selective, not including, for example, such specialized
publications as the Weekly Surveyor, the Scientific
Intelligence Digest, the Economic Intelligence Weekly,
or International Oil Developments.
- TAB D National Image Manipulation Laboratory Utilization report
for January 1977. Do you wish to continue to see these?
- TAB E "The Directorate of Intelligence: Brief Description."
A manual prepared for Admiral Turner, which DDI felt
you would like to see. (Held out per your suggestion, but
available.)
- TAB F DDA paper on the second seminar on creativity and ethics.
See covering note by [REDACTED] and covering memo by
DDA. 25X1

TAB G "A Forecast of the NPIC Operating Environment 1976-1985." Per attached references, you were aware this volume was in production and forwarded certain recommendations after reviewing its predecessor. The summary, pages 1-4, provides the main points.

TAB H

25X1

TAB I

TAB J

DDA memorandum "Annual Report, Component-Conducted Training, Fiscal Year 1976." The attachment to this memorandum provides more details on component-conducted training than you ever cared to know. Suggest, however, that first three pages thereof, clipped, provide good general picture.

TAB K

Intelligence Memorandum: World Trends and Developments. This is a new effort, designed by ORPA to serve the requirements of a new administration for quick views of various critical areas and of the world as a whole. It was also intended, [redacted] advises, to get ORPA off the ground, so to speak. Unfortunately, printing problems delayed its issuance until this month. It has been widely distributed in State, Defense/ISA, and the NSC Staff. The best way to get a quick fix on this survey is to glance over the Preface and Table of Contents, pages iii and v-vi. The Preface summarizes the salient points of the overview first chapter, "The Global Scene." (I don't suggest you read this except possibly for the first chapter, pages 1-7, as it is mostly old stuff. I thought, however, you would wish to be acquainted with this interesting new effort.)
